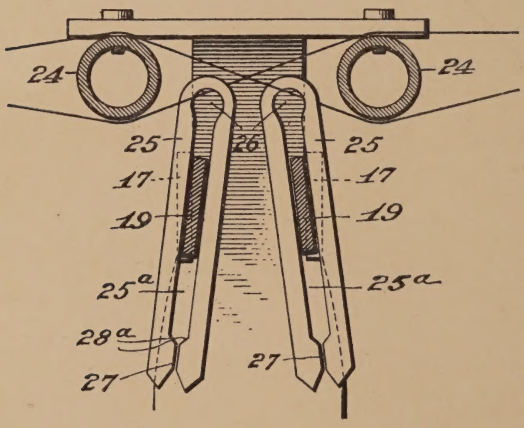
COLDWELL & GILDARD PATENT

We have heretofore called the attention of the trade to the Coldwell & Gildard Patent, Reissue No. 11,923, which has been fully sustained by the United States courts as covering the arrangement of drop-wires shown in the annexed illustration.

Fig. 5.



In view of the exhibition at the Southern Textile Exposition by Clemson College of a Stafford loom having the above arrangement, we wish again to warn the trade that The Stafford Company is under injunction against using this invention, and that any manufacturers who use this arrangement of warps and drop-wires without our license are infringing our rights under the patent, which we shall be obliged to enforce.
